### **Greene County Public Health Celebrates Achievement of Goal for Childhood Immunizations**

**XENIA, OH** – The immunization staff of Greene County Public Health is proud to announce that after much hard work and perseverance to protect the community’s children from vaccine preventable diseases, the results of the most recent internal Assessment, Feedback, Incentives and Exchange (AFIX) shows that ninety percent of the health district’s clinics’ three year olds are up to date on their immunizations.

AFIX is a continuous quality improvement process that requires the commitment and dedication of providers to achieve high levels of immunization coverage for the recommended series of vaccines. It is through these efforts that the state of Ohio is working toward the goal of 90% immunization coverage of patients by 24 months of age.

For more information on immunizations for your children, clinics available at the health district, or other questions, please call 937-374-5600 or visit the website at [www.gcph.info](http://www.gcph.info)
